Dear FCC,

I very much enjoy and have come to depend upon my XM satellite radio for its weather, news & traffic reports. As I am a psychologist consultant, and spend an average of 3 to 8 hours per day in my car, mainly between & on the DC & Baltimore beltways 495 & 695 and I95, not to mention ALL of MD's southern & northern counties, I very much NEED the XM service that frankly, is NOT available elsewhere. I am not able to watch the news or read ALL the papers I need to stay informed as needed to effectively accomplish my job, but with XM satellite I can and do. I pay for this service and I need it! I urge you DO NOT take it away! Do NOT leave this decision up to the NAB. This would be anti-american/capitalist. The NAB needs this progressive competition to move forward. I respectfully urge you to reject petition 04-160.
